Please allow a 50mm quiet area for any important content away from the very top of the artwork. This will ensure the top metal rail doesn't interfere with your design.

The Sustainable Printworks

Eco Roller Banner:
1,000 x 2,000 mm

Total Visual Area:
1,000 x 2,000 mm

Total Graphic Area (Finished Document Size Including Bleed):
1,010 x 2,105 mm

Please Include Crop Marks

NB: Includes 100mm at the bottom
(non-visible area which rolls into the cassette mechanism)
The side and top bleed will be removed during fitting.

Safe Area:

Any important text or graphics should be kept within the
safe area marked by the dashed line.
This will greatly improve the appearance of the artwork.

Please check your artwork quality by viewing your
document at 100% scale. If the images look pixelated (blocky),
this is how they will appear on the finished print.

Ideally, all images (photographs / logos etc.)
are at 150-300 dpi and CMYK profile.

Please check spelling and grammar (we do not proof
read or take any responsibility for any errors).

Export and then upload your artwork, as a
'High Resolution PDF' (preferred), AI or EPS document.
Remember to convert fonts to 'Outlines'.

Please allow a small quiet area for any important content away from the bottom section. This is to ensure your design has some breathing space.

Please extend your artwork into this section to prevent a border
appearing where the material is wound into the cassette.
Please note, it will NOT normally be visible.
